DETAILED ACTION

Drawings

The drawings are objected to because the specification discloses that the optional block of figures 2 and 3 "64" is a feedback link from block 40 to block 54 (see paragraph [0020]), but figures 2 and 3 shows an arrow from block 64 to block 40, this arrow should be reversed so block 64 feedback the signal from block 40 to block 54. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: In page 9 paragraph [0022] line 6 "a time delay of approximately 2 :s can be provided" is improper because it is not understood what the "2 :s" means. It seems impossible to be "2 s", because that will be inoperative, a additional latency of 2 s to receive the signal will produce a considerable additional delay in the transmission. Appropriate correction is required.

Allowable Subject Matter

Claims 1-25 allowed.

The following is an examiner's statement of reasons for allowance: Claims 1-25 are allowed because a comprehensive search of prior art failed to teach, either alone or in combination, generating an amplitude corrected multi-carrier signal based on the IF multi-carrier signal such that the amplitude corrected multi-carrier signal has a reduced dynamic range with respect to the IF multi-carrier signal, generating a digital cancellation signal based on the IF multi-carrier signals and digitally adjusting the digital cancellation signal such that carriers in the digital cancellation signal correspond to carriers in the IF multi-carrier signal having power levels above a predetermined threshold, as the applicant has claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Myer (US 5570350 A) discloses a RF signal processors employed in radio receivers and cellular communications systems to reduce the dynamic range of multicarrier signals. Myer doesn't disclose generating an amplitude corrected multi-carrier signal based on the IF multi-carrier signal such that the amplitude corrected multi-carrier signal has a reduced dynamic range with respect to the IF multi-carrier signal.

This application is in condition for allowance except for the following formal matters:

See above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
